

(1) Tags not inserting properly? Might be a bad needle — time for a new one!

(2) Pull out tag strip while pressing on black tag release button.

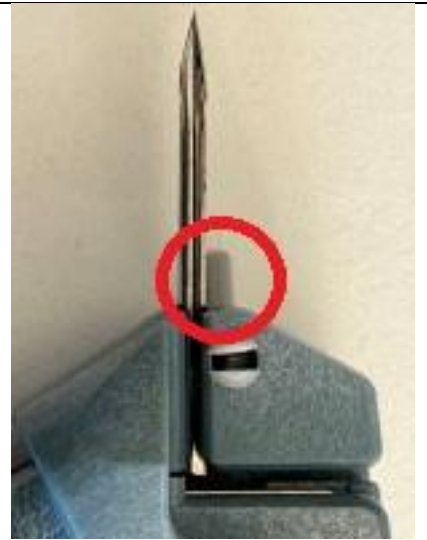

(3) Turn Buttoneer over. Flip UP the white needle release lever.

(4) Pull out old needle. **START HERE IF YOU HAVE A NEW TOOL.**

(5) Turn Buttoneer back over. Position new needle: groove facing you; divot on RIGHT.

(6) Insert needle all the way. Turn needle release on opposite side DOWN.

(7) Needle release should be down (locked position) on the opposite side.

(8) Insert tag strip into the corresponding slots. Push gently until strip stops moving and “clicks”.

Fireworks! Yay... you did it! 😊
